DETAILED ACTION

-)6+13

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2, 7, 8, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Wein (5044503). Wein teaches a method of opening and closing a container comprising, a body, a lid 164 (Fig. 38), a panel formed in at lest one wall of the body portion at 155 and 160. Panels 155 and 160 are attached to the lid 164 as shown in Fig. 38 and closing the lid as shown in Fig. 38.

Regarding claim 8, Wein teaches a body portion, a lid 164, a first condition in which a panel 155 is attached to both the lid 164 and the body 149, a second condition in which portion 155 is attached to the lid 164 as shown in Fig. 38.

3. Claims 14-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Moeller (4948038). Moeller teaches a body, a lid, a hinge at portions 424 and 124, the stationary portion is adjacent to portion 124 in Fig. 6 and at portion 22 in fig. 8 (note the hinge portion at 224.

Regarding claim 20, it is noted that the hinged portion 224 is aligned with the stationary portion, i.e, portions 124 is in alignment with the stationary portion (the portion hingedly attach to portion 124). The hinge portion is misaligned when there is a force acting to open the container as shown in Fig. 6.

4. Claims 1-3, 8, 9, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Williamson (3073501). Williamson teaches body, a lid 32, a panel 41 engaging the hole.

Application/Control Number: 09/972,575

Art Unit: 3727

- 5. Claims 1-3, 8, 9, 14, 15, and 17-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Fleming (2583211). Fleming teaches body, a lid 3, a panel 7 engaging the hole with hinge portions defined by fold lines 7x. it is noted that the lid in Fleming is considered a flip top as claimed.
- 6. Claims 1, 5, 7, 8, 12, 14, 16 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Block et al. (6152360). Block teaches a body, a lid 32, a wall 50, a panel 44 formed in at least one wall of the body portion. Block teaches the moving of the lid by opening the container causing the panel to separate from the wall,

Regarding claims 5 and 12, it is noted that the panel has a stationary portion 44 and a hinge portions 46 as shown in Fig. 4.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 3-4, 10, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wein in view of Wagner et al. (4565315). Wein meets all claimed limitations except for the plastic liner. Wagner teaches that it is known in the art to provide a plastic liner. It would have been obvious to one of ordinary skill in the art to provide a plastic liner in Wein as taught by Wagner to provide added protection.
- 9. Claims 3, 4, 10, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Block in view of Wagner et al. (4565315). Block meets all claimed limitations except for the

Art Unit: 3727

plastic liner. Wagner teaches that it is known in the art to provide a plastic liner. It would have been obvious to one of ordinary skill in the art to provide a plastic liner in Block as taught by Wagner to provide added protection. .

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tri M. Mai whose telephone number is (703)308-1038. The examiner can normally be reached on 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lee W Young can be reached on (703)308-2572. The fax phone numbers for the organization where this application or proceeding is assigned are (703)305-3579 for regular communications and (703)305-3579 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-1148.
